

CHETANKUMAR GANGJEE SIROKHA

Pune, Maharashtra, India | +91 8329104865 | cgs22297@gmail.com

PROFESSIONAL SUMMARY

Results-driven Data Engineer and Python Developer with nearly 6 years of experience in Banking, FinTech, Data Engineering, ETL Development, and Cloud Technologies. Experienced in designing scalable data warehouse solutions, developing ETL pipelines, automating operational workflows, and implementing cloud-native applications using Azure services. Proven expertise in Python, SQL, Shell Scripting, PostgreSQL, Azure Cosmos DB, Kubernetes, Grafana, and CI/CD pipelines. Strong background in Banking and Financial Services projects with hands-on experience in production support, report automation, cloud migration, and enterprise application development.

TECHNICAL SKILLS

Programming & Scripting:	Python, FastAPI , SQL, Shell Scripting, Bash
Data Engineering & ETL:	ETL Pipeline Development, Data Warehouse Design, Data Migration, Data Transformation, Data Modeling
Databases:	PostgreSQL, Azure Cosmos DB, Oracle SQL, Relational Databases
Cloud & DevOps:	Microsoft Azure, Azure Functions, Azure Applications, Azure CI/CD Pipelines, Kubernetes, Production Deployment
Visualization & Monitoring:	Grafana Dashboards, Reporting Automation, Data Visualization
Banking & Finance Domain:	Core Banking, RBI Reports, Audit & Reconciliation, Credit Card Statement Processing
Tools & Platforms:	Git, Linux, Unix, Docker (Basic)

PROFESSIONAL EXPERIENCE

Software Engineer

Nov 2025 – Present

Technogrowth Software Solutions (Client: Bajaj FinServ) | Project: Bajaj PayTech

- Developed Credit Card Smart Statement module for the Bajaj Finserv application, including designing and implementing high-performance **FastAPIs** specifically tailored for the credit card module architecture.
- Implemented Azure Functions for automated daily, previous month, and last 3 months statement fetching processes.
- Managed data storage and retrieval using Azure Cosmos DB.
- Worked on Continuous Integration and Continuous Deployment (CI/CD) using Azure Pipelines.
- Developed migration utilities for transitioning applications into Kubernetes architecture.
- Integrated PostgreSQL database solutions within Kubernetes-based deployments.
- Participated in production deployments, troubleshooting, and application monitoring.

Technologies Used: Python, FastAPI, Azure Functions, Azure Cosmos DB, PostgreSQL, Kubernetes, Azure CI/CD, SQL

System Engineer

Feb 2020 – Jun 2025

Tata Consultancy Services (TCS)

Project: SBI Core Banking Services (Client: State Bank of India)

- Generated and maintained daily banking reports including CAS Reports and RBI Reports.
- Automated report generation and delivery processes using Shell Scripting.
- Sent generated reports to designated departments for audit and reconciliation activities.
- Monitored batch jobs and ensured successful report generation within SLA timelines.
- Improved operational efficiency through automation scripts and monitoring utilities.

Technologies Used: Shell Scripting, SQL, Linux, Banking Reporting Systems

Project: TCS CodeVita

- Designed and developed centralized Data Warehouse architecture for integrating multiple standalone databases.
- Built ETL pipelines for extracting, transforming, and loading enterprise data into the Data Warehouse.
- Developed Grafana Dashboards for real-time data visualization and analytics reporting.
- Created automation scripts for generating candidate performance reports.
- Improved data consistency, reporting accuracy, and centralized analytics capabilities.

Technologies Used: Python, SQL, ETL, Data Warehouse, Grafana, PostgreSQL

EDUCATION

Master of Computer Applications (MCA)

Specialization: Computer Applications

PROJECT HIGHLIGHTS

Enterprise Data Warehouse Development

- Designed scalable data warehouse architecture for consolidating data from multiple distributed databases.
- Developed optimized ETL workflows for efficient data migration and reporting.

Banking Report Automation

- Automated mission-critical banking report generation processes for audit and reconciliation.
- Reduced manual operational efforts through Shell Script automation.

Cloud-Based FinTech Solutions

- Developed cloud-native financial statement modules using Azure services.
- Implemented scalable job scheduling using Azure Functions.
